US-PAT-NO: 6289382

DOCUMENT-IDENTIFIER: US 6289382 B1

TITLE: System, method and article of manufacture for a globally
                         addressable interface in a communication services
                         patterns environment

---------- KWIC ---------

Detailed Description Text - DETX (423):
   Exemplary products that may be used to enable this component include Visual
Basic; PowerBuilder; C++; Windows 3.x/NT/95; **X-Windows**/Motif; Visual C++;
Borland Delphi; AC FOUNDATION for FCP.

Detailed Description Text - DETX (429):
   Exemplary products that may be used to enable this component include
Microsoft Windows; Windows 95; Windows NT; Macintosh OS; Program Manager for
OS/2; **X-Windows**/Motif; JavaOS

Detailed Description Text - DETX (549):
   Exemplary products that may be used to implement this component include Real
Audio Player; VDOLive; Macromedia Shockwave; Internet Phone; Web 3270.

Detailed Description Text - DETX (550):
   Real **Audio Player**--a plug-in designed to play audio and video in real-time
on the Internet without requiring to download the entire audio file before you
can begin listening, or a video file before you can begin viewing.

Detailed Description Text - DETX (3715):
   Distribution Transparency. In a distributed environment, the process might
live on a different machine from the end user's machine. In that case, it
cannot launch the view directly, within its own executable. (Unless using a
remote windowing system like **X-windows,** etc.) So the View Configurer allows
application architects to transparently move process logic around, depending on
the distribution model.
